

Notable invertebrates associated with aquifer fed naturally fluctuating water bodies

Woodlice (Isopoda)

Trichoniscoides albidus Nb

Dragonflies and damselflies (Odonata)

Lestes dryas RDB2

Ischnura pumilio Local

Flies (Diptera)

Snail-killing flies, picture-wing flies, grass flies and allies (Acalyptrata)

Themira biloba (Sepsidae) RDBI

Soldierflies, beeflies, robber flies & allies (Larger Brachycera)

Eutolmus rufibarbis RDB3

Odontomyia angulata RDB1

Hybomitra muehlfeldi RDB3

Oxycera leonina [status not known]

Odontomyia tigrina N

Stratiomys singularior N

Hoverflies (Syrphidae)

Orthonevra brevicornis N

Orthonevra geniculata N

Xylota abiens N

Blowflies, dungflies, flesh flies and allies (Calyprata)

Cordilura aemula (Scathophagidae) RDB3

Phaonia atriceps (Muscidae) N

Beetles (Coleoptera)

Rove beetles and allies (Staphylinidae/Scydmaenidae/Silphidae)

Gabrius osseticus Nb
