

## Notable invertebrates associated with limestone pavement

### Snails and slugs (Mollusca)

<i>Vertigo angustior</i>	RDB1
<i>Vitrea subrimata</i>	Na
<i>Abida secale</i>	Nb
<i>Vertigo pusilla</i>	Nb usually on ivy-covered rocks
<i>Clausilia dubia</i>	Nb RDB3

### Woodlice (Isopoda) -terrestrial native species only

<i>Armadillidium pictum</i>	RDB3
<i>Armadillidium pulchellum</i>	Nb

### True bugs (Hemiptera)

#### Leafhoppers, planthoppers, froghoppers, treehoppers & cicadas (Auchenorrhyncha)

<i>Emelyanoviana contraria</i>	Nb
--------------------------------	----

### Flies (Diptera)

#### Hoverflies (Syrphidae)

<i>Microdon mutabilis</i>	N
---------------------------	---

#### Craneflies (Tipulidae)

<i>Dactylolabis sexmaculata</i>	N
---------------------------------	---

### Ants, bees and wasps (Hymenoptera: Aculeata)

<i>Osmia parietina</i>	BAP Priority
------------------------	--------------
