Pale colour typically with three bands radiating out

Grey chiton

Oval flattened creatures with eight armoured plates

Common mussel

Dark bluish - purple colour

Common oyster

Large round clam with oval/pear shape and rough surface

Sea potato shell

Shell of the Heart urchin

How to take part: Please send us records if you see any of these species and upload photographs via our website: www.buglife.org.uk/seashell-survey.

Take care! The seashore can be a slippery, rocky place watch your step, and check the tide times before exploring!

Observe and record seashore creatures, but leave them and their habitat as you found them. Only collect empty shells and leave plenty as homes for hermit crabs.

The Seashore Code

Always leave the seashore as you found it. Carefully replace rocks and seaweed in rockpools. Make sure you take your rubbish home.
