

The following is a list of the different groups of invertebrates that have been recorded in the UK living in terrestrial habitats. Where relevant we have included the Phylum, Subphylum, Class and Order for each group.

Common Name	Order	Class	Subphylum	Phylum
Earthworms	Oligochaeta	Clitellata		Annelida
Leeches	Hirudinea			
Woodlice	Isopoda	Malacostraca	Crustacea	Arthropoda
Sand-hoppers	Amphipoda			
Tongue-worms		Ichthyostraca		
Scorpions	Scorpiones	Arachnida	Chelicerata	
Spiders	Aranea			
Harvestmen	Opiliones			
Pseudoscorpions	Pseudoscorpiones			
Ticks	Parasitiformes			
Mites	Acariformes			
Centipedes		Chilopoda	Myriapoda	
Millipedes		Diplopoda		
Pauropods		Pauropoda		
Garden Centipedes		Symphyla		
Springtails	Collembola	Insecta		
Diplurans	Diplura			
Proturans	Protura			
Silver-fish	Thysanura			
Bristletails	Microcoryphia			
Mayflies	Ephemeroptera			
Dragonflies & Damselflies	Odonata			
Stoneflies	Plecoptera			
Cockroaches	Blattaria			
Earwigs	Dermaptera			
Grasshoppers & Crickets	Orthoptera			
Stick Insects	Phasmida			
Booklice	Psocoptera			
Biting Lice	Mallophaga			
Sucking Lice	Anoplura			
Thrips	Thysanoptera			

Common Name	Order	Class	Subphylum	Phylum
True Bugs	Hemiptera	Insecta		Arthropoda
Beetles	Coleoptera			
Stylopids	Strepsiptera			
Bees, Wasps, Ants & Sawflies	Hymenoptera			
Snakeflies	Raphidioptera			
Lacewings	Neuroptera			
Alderflies	Megaloptera			
Scorpionflies	Mecoptera			
True Flies	Diptera			
Fleas	Siphonaptera			
Caddisflies	Trichoptera			
Webspinners	Embioptera			
Moths & Butterflies	Lepidoptera			
Snails & Slugs		Gastropoda		Mollusca
Round-worms				Nematoda
Horsehair Worms				Nematomorpha
Flatworms		Turbellaria		Platyhelminthes
Flukes		Monogenea		
Flukes		Trematoda		
Tapeworms		Cestoda		
Protozoa				Protozoa
